25X1A REF: [REDACTED] dated 15 February 1967

5X1A

25X1A

1. The planning for the modification to the power plant at [REDACTED] receiver site with the associated wiring changes is presently being conducted by Headquarters' staff. This office has presented the technical requirements to the Office of Logistics who will prepare the necessary scope of work and negotiate through [REDACTED] channels for an A&E firm to undertake the work.

2. The changes recommended by you on your unnumbered single line drawing dated 15 February 1967, with exception to the no-break transformer which we have increased to 300 KVA, since the new UPS is rated 175 KW, and the items covered in the reference will be followed as far as possible.
